All quality control criteria, as outlined in the methods, have been met except as noted below or on the following analytical report.

The following is a definition of flags that may be used in this report:

Flag	Description	Flag	Description
A	Method holding time is 15 minutes from collection. Lab analysis was performed as soon as possible.	L	LCS recovery outside control limits.
B	Analyte was found in the method blank.	M	MS recovery outside control limits; LCS acceptable.
<	Analyte not detected at or above the reporting limit.	P	Chemical preservation pH adjusted in lab.
C	Sample received in an improper container for this test.	Q	Result was determined by a GC/MS database search.
D	Surrogates diluted out; recovery not available.	S	Analysis was subcontracted to another laboratory.
E	Estimated result; concentration exceeds calibration range.	T	Result is less than three times the MDL value.
G	Surrogate recovery outside control limits.	W	Reporting limit elevated due to sample matrix.
H	Analysis or extraction holding time exceeded.	N	Analyte is not part of our NELAC accreditation or accreditation may not be available for this parameter.
J	Estimated result; concentration is less than routine RL but greater than MDL.	ND	Analyte was not detected using a library search routine; No calibration standard was analyzed.
RL	Routine Reporting Limit (Lowest amount that can be detected when routine weights/volumes are used without dilution.)
